

INTERNATIONAL POSTGRADUATE MEDICAL COLLEGE

FACULTY OF DENTISTRY

Limited attendance – 15 Dentist (3 Clinical Groups)

Tuition Fees- 3500 USD

Mastering Oral Sedation in Dentistry

One week online lectures

3 - Day live sedation Training

Course Objectives:

1. Understand the fundamentals of oral sedation in dentistry
2. Learn how to assess patients for oral sedation
3. Understand the pharmacology of commonly used oral sedatives
4. Develop skills in administering and monitoring oral sedation
5. Learn how to manage complications and emergencies related to oral sedation

Course Outline:

1. Introduction to Oral Sedation – Dr. Christopher Ogunsalu

- Definition and history of oral sedation
- Benefits and limitations of oral sedation

2. Patient Assessment and Selection – Dr. Delroy Fray (Jamaica) and Dr. Seyi Oyesola (UK)

- Medical and dental history
- Patient evaluation and selection criteria

3. Pharmacology of Oral Sedatives – Dr. Seyi Oyesola (UK) and Dr. Ken Adegoke (UK)

- Benzodiazepines (e.g., triazolam, diazepam)
- Non-benzodiazepines (e.g., zolpidem, eszopiclone)

4. Administration and Monitoring of Oral Sedation – Dr. Seyi Oyesola (UK) and Dr. Ken Adegoke (UK)

- Routes of administration (oral, sublingual, etc.)
- Dosing and titration
- Monitoring vital signs and level of sedation

5. Managing Complications and Emergencies – Dr. Seyi Oyesola (UK) and Dr. Ken Adegoke (UK)

- Respiratory depression and airway management
- Cardiac complications and emergency response
- Other potential complications (e.g., allergic reactions, overdose)

6. Clinical Applications and Case Studies - – Dr. Seyi Oyesola (UK) and Dr. Ken Adegoke (UK), Dr. C Ogunsalu (Jamaica)

- Oral sedation for anxiety and fear
- Oral sedation for special needs patients
- Case studies and group discussions

7. Regulatory and Legal Considerations - – Dr. Seyi Oyesola (UK) and Dr. Ken Adegoke (UK)

- Overview of regulations and guidelines for oral sedation
- Informed consent and patient communication

8. Anatomy of the Respiratory System – Mr. Mike Gardner (Jamaica)

9. Physiology of the Respiratory System - Dr. Dagogo Pepple and Professor C Nwokocha (Jamaica)

10. Oral Sedation in Dentistry with Anterograde Amnesia – Dr. Chris Ogunsalu

Teaching Methods:

1. Lectures and presentations
2. Case studies and group discussions
3. Hands-on training and simulations
4. Interactive quizzes and assessments
5. Live sedation Patient.

Target Audience:

1. General dentists
2. Specialist dentists (e.g., oral surgeons, periodontists)
3. Dental hygienists and assistants (Free if attending with the Dentists)

Course Format:

1. In-person training (Clinical/Operative)
2. Online training (Direct online)
3. Hybrid training (combination of in-person and online training)

Course Duration:

1. One week (in-person or online)
2. 3 days Clinical/ operative)

Certification and Accreditation:

International Postgraduate Medical College – Certificate of Completion of training in Oral Sedation in Dentistry

Our Faculty

Dr. Delroy Fray. MBBS, FACS, FRCS. RCPS (GLAS), FFD (IPMC)

Mr. Mike Gardner. BSc (UWI), FFD (IPMC)

Dr. Chris Ogunsalu. MBBS, BDS, FRACDS, FICD, FICS, FWACS, PhD, LLB, LLM

Dr. Ken Adegoke. MBBS, FFA[UK]

Dr.Seyi Oyesola. MBBS, FFA[UK]

Dr. Dagogo Pepple. PhD

Professor Chukwuemaka Nwokocha. PhD
